---	---

Universitas Widyatama (<i>classes for working students</i>) <i>Bachelor of Science in Information Technology (GPA 3.25/4.00)</i>	Bandung, Indonesia 2021 – Present
--	---

WORK EXPERIENCE

Wimiku Indo Digital <i>Front End Website Developer</i>	Jakarta, Indonesia May 2018 – June 2019
--	---

- Develop responsive website interfaces using code igniter 3 for certain diving spots around Indonesia,
- Collaborated closely with designers and backend developers to create user-friendly and visually appealing experiences.
- Implemented interactive features such as photo galleries, location maps, and a simple booking system for dive tours.
- Optimized website performance to ensure fast loading times on both desktop and mobile devices.
- Conducted cross-browser and cross-device testing to maintain consistency and functionality across platforms.
- Contributed to UI/UX improvements based on user feedback and site analytics.

Avisena Hospital <i>Staff IT</i>	Cimahi, Indonesia June 2019 – December 2021
--	---

- Provided technical support and troubleshooting for hardware, software, and network-related issues across departments.
- Maintained and monitored local area networks (LAN), internet connections, and internal servers to ensure system reliability and security.
- Installed, configured, and updated operating systems, business applications, and antivirus software.
- Assisted in data backup routines and disaster recovery procedures to protect critical business information.
- Supported the development and maintenance of internal applications using PHP and MySQL to streamline administrative processes.
- Documented technical procedures and created user guides to improve IT knowledge sharing among staff.
- Coordinated with vendors and external IT service providers for procurement and system upgrades.

Avisena Hospital**Cimahi, Indonesia***Head Of IT**December 2021 – Present*

- Lead the planning, development, and implementation of IT strategies aligned with organizational goals.
- Manage and oversee the IT team, ensuring smooth operation of network infrastructure, systems, and applications.
- Supervise the maintenance and security of servers, databases, and company-wide information systems.
- Direct software development projects including web-based applications, internal tools, and digital transformation initiatives.
- Establish IT policies, procedures, and best practices to improve operational efficiency and data security.
- Coordinate with executive leadership to evaluate and implement technology solutions that drive business growth.
- Monitor IT budgets, procurement, and vendor relations to ensure cost-effective and scalable technology investments.

Avisena Hospital**Cimahi, Indonesia***Full Stack Developer**December 2019 – Present*

- Designed, developed, and maintained web-based applications to support hospital operations, including patient registration, medical records, and internal reporting systems.
- Built and optimized both front-end (HTML, CSS, JavaScript, Bootstrap) and back-end (PHP, MySQL, CodeIgniter/Laravel) components for responsive and secure healthcare platforms.
- Integrated third-party APIs and systems such as laboratory information systems, BPJS (national health insurance), and internal HRIS.
- Collaborated with medical staff and administrative departments to gather requirements and deliver user-centric solutions that improved workflow efficiency.
- Implemented role-based access control to protect sensitive patient data in compliance with data privacy standards.
- Conducted regular system maintenance, bug fixes, and performance enhancements to ensure stability and reliability of hospital applications.
- Participated in server management and deployment using shared hosting and local infrastructure environments.
- Provided training and technical documentation for end-users and internal staff.

SKILLS

Language: PHP, Javascript, HTML, CSS**Frameworks :** CodeIgniter 3, CodeIgniter 4 & Laravel**Others :** Figma, Ms Office, Sketch Up, Adobe Photoshop**PROJECT**

E-Nyelam*December 2018*

Enyelam is a web-based platform that provides comprehensive information about diving trips across Indonesia. The website is designed to help diving enthusiasts explore the rich underwater biodiversity of the Indonesian archipelago by offering curated trip details, locations, schedules, and tips for divers of all levels.
